Defect Log

Defect No.	Defect Description	Defect Severity	Type of Higher Order Testing	Test Case No. or Description
1	Was not clear what the “Interactions” view was, never found an “Interactions” button interface.	2	Function	Found during Interactions View testing.
2	After adding around 15 photos to a profile, the effects of Bug #3 and Bug #4 (below) become more pronounced. Crashes become much more frequent even though the total number of photos is very small.	1	Volume	Found during Upload Photo and Profile View tests.
3	Photos in the profile and feed views change constantly, making it difficult for a user to find and interact with photos.	3	Usability	Found during testing of Photo Liking & Unliking, Photo Comments, and Comment Replies features.

4	Scrolling down to the bottom of the feed and scrolling back to the top again will almost always crash the app on my phone (iphone 5c).	2	Reliability	Came across this during testing the Local Photo Feed features.
5	Recent activity tab has its table way below the top of the screen, leaving useless white space and bad UI	2	Usability	Found during testing of recent activities tab and notifications
6	Comments on photos are unable to handle long text, text is trimmed off	1	Volume	Found during testing of comments under photos
7	The star button on the top right of the feed tab is not intuitive, when I pressed it I did not know what it did and how it sorted the images in the feed view	2	Usability	Found during Testing the feed view tab and the button on the top right.
