## Defect Log

Defect No.	Defect Description	Defect Severity	Test Case No. or Description
1	Attempting to post a photo taken directly from the app with no caption causes the app to fail to upload the image.	1	Upload Photo 001
2	Uploaded photos will sometimes change or seem to switch places with other photos.	3	After uploading several photos I noticed that while scrolling through my profile images would appear to change places and then return to their original place.
3	Uploading a photo with any filter other than the original will cause the photo to be rotated 90 degrees in the preview display.	3	Apply Filter 001
4	Password Reset doesn't seem to send any email to the registered address.	2	Password Reset 001
5	When deleting a photo, the app	3	Photo Deletion

	doesn't ask for confirmation before attempting to delete the photo.		002
6	When deleting the photo, after pressing delete the photo remains on the user's profile	2	Photo Deletion 001
7	Activity tab of the app has UI placing issues, the first notification is shown after a lot of white space.	2	Found while looking at the UI of the Activity tab
8	Someone else's profile picture is shown on a user's account. Picture seems to be overwritten.	1	Profile Picture 002
9	When the user presses the like button, it does not work, the count for likes is not updated, there is no animation on click either.	2	Liking photos 001
10	When a user writes a long comment, it is trimmed off	2	Commenting on photos 001
11	When a user writes a long caption when uploading a photo, the caption is trimmed off.	2	Caption Photo 001
12	If you go to upload an image, but click upload before selecting an image it displays an error, and then kicks you back to the feed page.	3	Discovered during Upload Photo tests.
13	When using the "noir" filter from the upload photo page, the app posts the picture twice.	3	Discovered during Upload Photo tests.
14	When a user tries to change their profile picture, the app never prompts the user to take a photo. A user can only select an existing photo on their phone.	3	Change Profile Picture 001
15	Never found a way to enable "interactions" view.	2	Interactions View 001

---

16	Scrolling while viewing another user's account does not scroll all the way down, partially obscuring the last row of pictures.	2	Profile View 001
17	Reply button for comments is off to the side so far that it is barely visible (on iphone 5c).	2	Commenting on Photos 001
18	Date of photos is incorrect. One in particular was said to have been taken on April 15, when I took it on April 14.	3	Found during testing of Photo Sharing tests.
19	Failing to provide a valid signup credentials produces an error message that is very un-descriptive. It just says "bad!!! Invalid Credentials" without specifying why.	2	User Register 002 User Register 003
20	Also, when trying to delete a picture, the app redirects to the Feed page.	2	Deleting Photos 001
21	Profile View also cuts off pictures in the second column, obscuring much of the picture (on iphone 5c)	3	Profile View 001
22	The application crashes very often when scrolling through the Feed and other pages.	1	Occurred throughout all testing.
23	The Activity Feed places new entries at the bottom of the list instead of at the top.	2	Activity Feed 001
